

E-ink screen

Dual-sided electronic nameplate

VIS-NP10E

paperless, no printing required desktop nameplate

Solution & Features

Effortless electronic nameplate, preload names and titles in one click. Syncs with conference system to automatically highlight speakers as they join. The glare-free E Ink display reduces eye strain for all-day use. Choose classic black or sleek silver to match any professional setting.

1

Multi-Language & Tri-Color Display

Compatible with all languages (Arabic, Thai, Mayan, etc.), symbols, and three colors (black/white/red) for customizable nameplate layouts via software.

2

Dual-Sided Flicker-Free Screen

10.85" ultra-thin design (8mm) with anti-glare coating, blue light-free backlight, wide viewing angle, and high contrast for visibility in photography/video environments.

3

Zero Power, Year-Round Readiness

E-Ink display sips power with 1-year battery life. Integrated LED indicator syncs speaking status via VISONIC system.

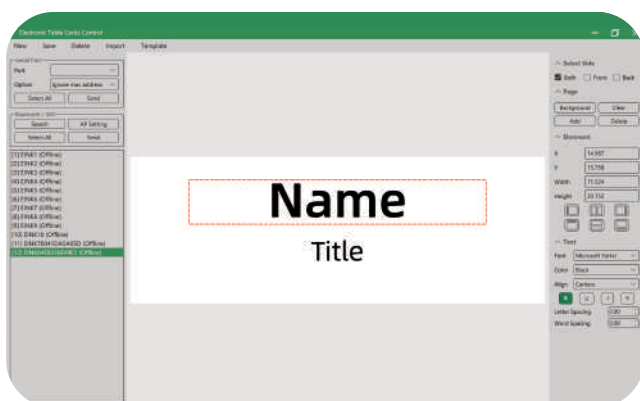

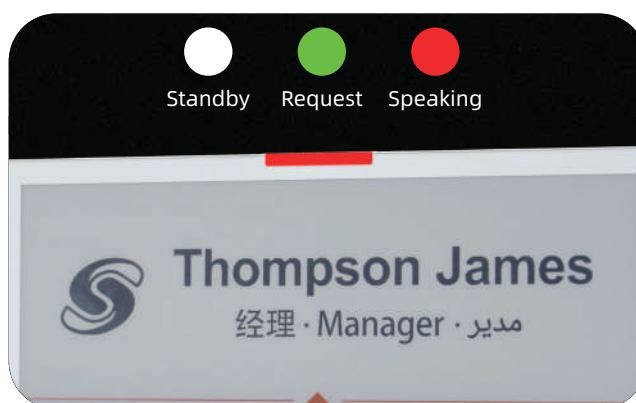

Premium Build

Aluminum alloy: corrosion-resistant & optimal weight. Paired with glare-cutting acrylic for durability and crisp E-Ink visibility.

LED Dual-Color Indicator

When speech request mode is enabled, the VIS-NP10E button serves as a request button. Pressing it triggers the LED indicator to flash or stay lit, notifying the chairperson of the request.

Real-Time Edits

Update seats or attendees instantly via Wi-Fi/Bluetooth using web or software. Bulk refresh multiple nameplates simultaneously through wireless gateway pairing.

Eye-Safe Clarity

E-Ink backlight-free display cuts eye strain. 1360x480 resolution (144 DPI) delivers print-sharp text and graphics.

About us

VISSONIC delivers tailored AV solutions to millions across 52 countries and 350+ cities, combining precision pre-sales engineering, hands-on integration support, and responsive maintenance through our global partner network—every phase streamlined for your conference ecosystem.
